Notes:

- The free Chlorin content at the time of production is equal to 56 % of the percentage of Sodium dichloroisocyanurate dehydrate. Afterwards the free Chlorine % is subject to a physiological decrease until a stabilization of the content after approximately 3 -6 months.
- The anionic component Benzenesulfonic acid, sodium salt contains about 7.5% of sodium citrate dihydrate (CAS 6132-04-3, PM: 294)
